

KAN Quick Floor

ISO 9001 : 2000

KAN Quick Floor – an internet program for quick calculation of floor heating, conforming with PN-EN 1264 norm.

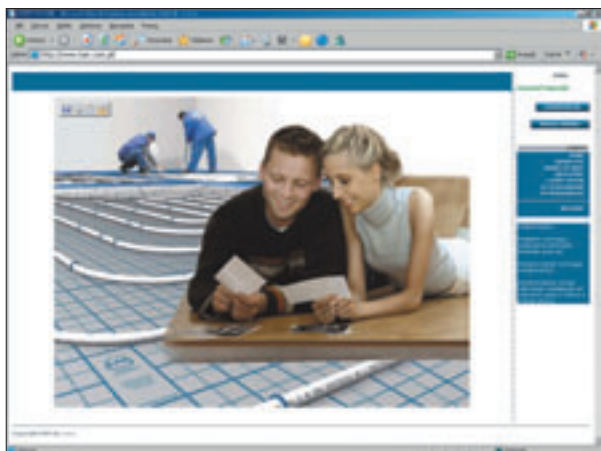

KAN Quick Floor is available at www.kan.com.pl in two versions:

■ **Basic**

designed for people who do not have much experience in designing floor heating (individual investors, installation contractors).

■ **Extended**

designed for people who know designing rules and **KAN-therm** System assortment (possibility of modifying calculation parameters).

KAN Quick Floor

KAN Quick Floor program :

1. Makes heat and hydraulic calculations of floor heating

in **KAN-therm** System laid using wet and dry methods:

- selects calorific effect of radiators, necessary pipe spacing, number of heat circuits in rooms, calculates pressure drops in heat circulations,
- checks heat comfort conditions in rooms.

2. Gives material specification in **KAN-therm** System with price evaluation of:

- amount of pipes, thermal dilatations and installation equipment,
- amount and type of thermal insulations depending on selected system of laying pipes,
- amount and size of distributors together with boxes,
- type of control automatics.

KAN Quick Floor is like **KAN-therm** System floor heating – full user comfort.
